

# Web Content Filtering

Managing web access in the workplace.

## IT Force Web Protect - protecting your business and improving employee productivity

*When does an employee accessing non-work related websites become a problem?*

- When work time is being wasted, productivity is suffering and the IT infrastructure is compromised.
- When these websites contain objectionable advertising, pornographic content or dangerous malware.

### WHY IS IT A BIG DEAL?

**Time spent on FACEBOOK at work is rising.**

60% of all Facebook posts occur during work hours.

1 million links are shared every 20 minutes!

After Google, **Facebook** & **YouTube** are the top most visited sites in Ireland.

**More employees are accessing PORN sites.**

67% of companies have caught someone in the last 12 months viewing pornographic material in the workplace, compared to 31% in 2008.

**Significant growth in NUMBER of websites.**

935+ million active websites in 2015, compared to 68 million in 2008.

### HOW CAN WE HELP YOU?

IT Force can help you to implement an effective internet usage policy. Our solution, **Web Protect**, is a powerful and budget friendly web content filtering tool that boasts the following features:

- URL Filtering – denies access to specific categories of websites e.g. gambling, pornography, social media etc.
- Content blocking - denies access to unwanted keywords and file types
- Capable of applying the same internet usage rules to your company and guest WiFi.
- Allows you to customise the categories to suit the specific requirements of your organisation.
- Easy to set up, easy to manage and totally scalable – making it incredibly cost effective.
- Includes anti-phishing protection.
- Updates are implemented as they occur.

Let us help you to protect your network by blocking access to inappropriate and unsuitable websites.
